"Q: DB2 - Query to get the value from BLOB field I have a table column having BLOB type. Is there any way to get the data from that field via query. I don't want to use the CAST command in the db2 since it will convert the data to some other datatype and loss the data. Thanks in advance. A: The DB2 SDK contains code to get a BLOB value and there is an example in the doc on how to do it. You could always avoid CAST as you do not have to remember to do that for EVERY time to retrieve the data. Example code from the doc: SQL> DECLARE 2 L_clob CLOB; 3 L_cursor NUMBER; 4 L_cnt NUMBER; 5 BEGIN 6 L_cl
