Windows Server AppLocker™ is designed to simplify your deployment

What's New In Microsoft Exchange Server User Monitor?

Represents one of the Microsoft tools for monitoring Microsoft Exchange Server. Gather real-time data from individual computers in your organization and analyze the results to plan for future work. The Microsoft Exchange Server User Monitor is a standalone application that installs the Exchange Database Monitor service to perform this function. The user monitor checks Exchange databases in Microsoft Exchange Server 2007 and Exchange Server 2010 through the System Center Service Manager console. The user monitor can be used on Microsoft Exchange Server 5.5, Microsoft Exchange Server 2000, Exchange 2000 Server, and Exchange Server 2003. The Microsoft Exchange Server User Monitor tool is the successor to the Microsoft Exchange Client Monitor, which was released to test Exchange 2000 Server with MAPI (2003) on Windows 2000. The Microsoft Exchange Server User Monitor tool is included in the support subscription; the Exchange Database Monitor service is part of the Standard Support and Security package. The Microsoft Exchange Server User Monitor tool is provided as a pre-configured system but can be installed as part of the Microsoft System Center Service Manager console in Microsoft Windows Server 2008 Standard, Enterprise, or Datacenter. Microsoft Exchange Server User Monitor Limitations: The Microsoft Exchange Server User Monitor tool currently works with Windows Server 2008 or Windows Server 2008 Standard. After the installation you must set the user monitor to run with the System Center service manager. You cannot run the Microsoft Exchange Server User Monitor with Microsoft Exchange Server 2007. The Microsoft Exchange Server User Monitor does not include any tool for locating the Exchange root that runs Exchange 2003. The Microsoft Exchange Server User Monitor does not monitor Active Directory servers. The Microsoft Exchange Server User Monitor does not monitor Microsoft Exchange Server

2010. Microsoft Exchange Server User Monitor Menu Items: To navigate in the User Monitor tool you need to select an option from the menu. Configure and report on current clients. Configure a previous report. Help. Exit. Configure a previous report. Previous. Configure a previous report. Next. Exit. Configure an IP address report. New. Existing. All. Graphical. Email. Http. Convert to Graphical. Export. Graphical. Edit. Exchange (Internet). Standalone (Internet). Add to consolidation group. Remove from consolidation group. Configuration report. Options Menu text. Configure a previous report. Previous. Configure a previous report. Next. Exit.
