Infinifactory is a 2011 American science fiction action comedy film directed by Jon Favreau and written by Jon and Colin Jost. The film stars Favreau, Jost, Favreau's wife and SNL castmate Kristen Wiig, and Bruce Willis. The film is a parody of the "infinite-button factory" setting of The Animatrix, and the film includes parodies of several films and media from the early 21st century, including The Matrix, Toy Story, The Big Bang Theory, and Anchorman. Favreau is also known for his work directing the first and fourth episodes of The Venture Brothers. Principal photography began in April 2010 in Los Angeles. The film was released in the United States on June 3, 2011, by Paramount Pictures. It received negative reviews from critics and earned \$56.4 million at the box office, against a \$30 million budget. Plot In the year 2009, in the year that humanity first encounters Transformers, scientists have created and genetically engineered an unnamed, intelligent, lab-coated robot with the ability to transform from a human-sized humanoid into an 18-wheel truck. These 'Infinities' are the personal androids of Peter and Duncan Phillips, shown as wealthy con artists. Peter is a baby boomer with a failed marriage to a woman named Megan, who became increasingly infatuated with his iconic 1970s comedy character Bob Devaney. (Based on Peter's TV appearances, Bob Devaney is known as "The Intergalactic Space Cop".) Duncan was young Peter's sidekick, and now is his elder by roughly 15 years, and was responsible for devising the fake identity that Peter uses. Duncan has a wife named Annie, and is shown as a staid, old-school accountant in the 1990s. The creation and deployment of the Infinities series of humanoid robots have been severely hampered by an oversight at the beginning of human development of the race. As production on the first generation of Infinities robots were completed, the government issued them with "swipe cards", which would transfer the Infinities' personalities, memories and experiences into a series of backup files. When one of the robots became self-aware and began to display a growing independence, they were forced to shut down all production on the Infinities Series. The Infinities robots were quarantined and detained by the U.S. Government, unaware of
