Enter the URL you would like to insert below (see picture) A: It's a jpeg icon with a lion. I don't know of a free one. Here's a paid one that might work: Q: how to add a column with distinct values with condition? I have a table Table1 with two columns, ID and Name. I want to add a new column with a column ID with value 0 with the condition that: for each id there can be only one name, so if there are two names with the same id, then in the new column the ID will be 1, in the next iteration the ID will be 2 and so on. A: We can do this using a cumulative sum. If we define an ID\_col column, and define the values of this column for each ID as incremental sequences: alter table t add id\_col int generated always as (select row\_number() over (order by id) from (values (0), (1), (2), (3), (4), (5), (6), (7), (8), (9)) s (id) ) ; Then we can apply a cumulative sum to this column: select t.\*, id\_col.val from t join (select id\_col.val from t t1 where t1.id = t.id order by id ) id\_col on 1 = 0; Here is a dbfiddle. EDIT: If you want to pick one of the columns, you can do: select t.\*, max(id\_col.val) over (partition by id) from t join (select id\_col.val from t t1 where t1.id = t.id order by id ) id\_col on

At the infinito site, it is presented an application called Anatomia Canina 3D with which you may view in animated way, to a school textbook presentation, the 3D and 2D models (pictures and drawings) of the heart, its chambers, valves and its connections with the circulatory system, thoracic organs (lungs, pleura, diaphragm and esophagus) and thoracic-abdominal organs (stomach, duodenum, pancreas and colon). There is an animation of the heart, showing clearly that the three cardiac chambers exist and how they occupy space. This activity has been divided into two parts: part one shows (with well-known diagrams) the structure of the heart and its chambers, and part two shows the heart in motion. The program comprises modules of objects in three dimensions that you may operate and animate. Part one contains the heart and its chambers; Part two contains the heart in motion. Software Anatomia Canina 3D Demo Software Anatomia Canina 3D Demo The application allows you to view, in 3D mode or in 2D mode, videos of the heart in action. Also included is a complete program on the anatomy of the dog.
